Environmental and Resource Management Policy

1. Promote and raise awareness among managers and employees about climate change and its negative impact on the organization, while emphasizing the importance of efficient utilization of resources.
2. Collect data on resource usage (electricity, water, paper and fuel) for each branch. Create data on resource usage comparison, including reports in the meeting. Also, create an environmental manual to instill and promote environmental conservation awareness among employees to maximize resource usage.
3. Consider the impact on biological diversity and protecting ecosystems from selection processes in the establishment of branches that may pose risks to habitats or affect endangered species.
4. Promote the adoption of standardized and contemporary products and innovations in organizational operations, such as utilizing renewable energy from solar technology, implementing paperless initiatives with E-Receipt technology, and advocating for certified Green Products.
5. Comply with environmental regulations and strive to exceed legal requirements.
6. Promote environmental sustainability in the supply chain by selecting partners, contractors and business partners based on their environmental management capabilities, environmental responsibility and compliance with the company's environmental policy.
7. Monitor climate change by studying practices to reduce carbon footprint in the organization in line with international standards.
